

WORKPLACE ENVIRONMENTAL POLICY

B&B Fabrication and its management, in line with its core values, is committed to minimise and continuously reduce the negative environmental impacts of its workplace activities in these particular areas as per our Environmental Management Plan 2011.

The following are intended to achieve these targets:

- Reduce our use of water and make more use of waste water and rainwater
- Alter our pattern of transport use to reduce our contribution of greenhouse gas emissions
- Separate our waste, re-use, recycle and compost materials wherever possible
- Try to purchase products and use suppliers that meet strict environmental and ethical criteria
- Maintain a healthy working environment for staff and avoid products and finishes that are harmful to health
- Give a preference to best energy rating performance when purchasing equipment including computers and monitors
- Endeavour to purchase tools and equipment that have low emissions
- Seek ways to reduce its use of water by harvesting rain water
- Seek ways to reduce travel by road and travelling long distances
- Purchase low emissions rating vehicle and equipment wherever possible and practical
- Continuously seek ways to reduce our waste production by re-use and recycling wherever possible and practical
- Avoid products which contain toxic substances and continue to source the most environmentally friendly product when available
- Continuously seek ways to improve the health of our work environment for workers contractors and visitors
- Actively encourage our employees, contactors, supplies and visitors to embrace a proactive and effective attitude to the environment
- Establish and review measurable objectives and targets at relevant functions and levels of the business
- Review and monitor annually
